PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of experience owning end-to-end product development across distributed backend systems and high-performance frontend interfaces. Proven track record building production systems at scale, including an enterprise OIDC/SSO provider serving 600K+ users. Strong command of React.js for delivering polished, accessible UIs. Hands-on experience with CI/CD automation, system design, and driving measurable reliability and performance improvements.

SKILLS

Languages: Python, C++, JavaScript, TypeScript

Frameworks: FastAPI, Node.js, Express.js, React.js, Next.js, Redux, Jest, REST API

Databases: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS, CloudFormation, ECS, S3, Lambda, API Gateway, Azure, Docker, Git, GitHub Actions, CI/CD

Other: Generative AI, Prompt Engineering, Agile Methodology

PROFESSIONAL EXPERIENCE

System Engineer, TCS – Delhi

Sep 2023 – Present

- Architected and deployed a custom OpenID Connect provider with full OAuth 2.0 authorization server support, enabling enterprise-grade SSO for 600K+ users with 98.9% authentication uptime.
- Led end-to-end cloud migration from Heroku to AWS (ECS, CloudFormation, CloudWatch), implementing a high-availability, auto-scaling architecture; engineered GitHub Actions CI/CD pipelines that cut deployment time by 60% (20 to 8 min).
- Developed and optimized enterprise-grade core healthcare microservices using Node.js, React.js, Python, Redis, PostgreSQL and AWS, improving response times by 25%.
- Built a resilient reprocessing pipeline using AWS DynamoDB to capture and retry failed user registrations due to service downtime or consent-storage failures, achieving an 89% reduction in registration backlog through a 3-attempt retry mechanism and automated incident escalation.
- Established a test engineering culture by authoring comprehensive unit and integration test suites (Jest) for authentication flows and core APIs, achieving 85%+ coverage and enabling confident, high-velocity releases on critical features.

Full Stack Intern, Swarajya – Remote

Oct 2022 – Dec 2022

- Developed dynamic and reusable email templates with **HTML, CSS, and responsive design principles**, ensuring compatibility across clients and enhancing user experience.
- Built a referral system with automated email integration, increasing newsletter subscriptions by **21%**.
- Built a dynamic email generation system using **Handlebars.js** for template rendering and integrated it with backend newsletter services, enabling automated, personalized daily communications to subscribers.

Full Stack Intern, Agriday – Remote

Apr 2022 – Oct 2022

- Built a React.js web platform using React Router and Context API with RESTful backend integration.
- Created scraping scripts that continuously collected high-level data from online sources, enabling near real-time streaming with 90% data availability.
- Integrated real-time in-app messaging using Firebase Cloud Messaging for instant user notifications.

PROJECTS

Real-Time Multiplayer Collaboration Platform | *React, Node, Socket, Canvas*

- Developed a event-driven multiplayer platform using Socket.io and Node.js supporting concurrent users with low latency.
- Designed scalable frontend state synchronization and interactive Canvas-based rendering for collaborative sessions.
- Improved UI maintainability and responsiveness using modular SASS architecture and reusable UI components.

EDUCATION

FET GKV Haridwar, B.Tech. in Computer Science

Jul 2019 – Jul 2023

- CGPA: 8.8/10.0
